Episode 11: Featured Ride - Ford Escort RS2000
Featured Member - Johan Hattingh

I bought a Ford Escort RS2000 way back in 1993. I had good intentions of building it up immediately but I became distracted by, and ended up focussing on, other projects.

Over the years I had various offers from people wanting to buy the Escort, but since this is such a rare model I decided to keep it in storage until I had the time to restore it. 15 Years later, I'm happy to announce that this project has finally begun.

This vehicle has only had one previous owner. Soon after fitting a new sound system the car caught alight and damaged the engine compartment and wiring harness. That was it for him and he decided to get rid of the car.

I have lots of great ideas for this car and hopefully you'll all get to see what they were when the car is finished!

Cheers -
Johan
